REMARKS/ARGUMENTS

This is in response to the official action dated September 8, 2006. Reconsideration is respectfully requested.

*Claim rejection under 35 USC § 112*

The Examiner rejected claims 1-10 as being indefinite for failing to particularly point out and directly claim the subject matter which applicant regards as the invention. Claims 1, 2-10 have been amended to overcome this rejection.

*Claim rejection under 35 USC § 103*

Claims 1 and 2 are rejected as being unpatenable over Lautenschlager, (US 4,251,900) in view of Beneke et al, (US 5,012,551). In response, applicant submits that neither the Lautenschläger reference nor the Benecke reference disclose or suggest any hinging mechanism which includes any engagement of portions, such as joint arm portions (such as 24a; 24b in the present invention) which are displaceable relative to one another such that they engage telescopically. Lautenschläger discloses a "over-center element" which is biases by a closing spring ; Benecke also does not include a telescpopic hinging mechanism. Claim 1 has been amended to now also include this feature.

Accordingly, claims 1 and 2 should also be allowed.
